

## **NOISE POLLUTION**

**Prof. Sakhare V. U.  
Dept. of Physics  
S.S.C.College, Junnar**

**Abstract :**      **Nosie levels of Junnar City remarkably increased during Ganesh Festival 2016 remarkably increased during Ganesh festival 2016 Were done by Simple dB meter.**

Junnar town is one of best peaceful, vibrant & hill station. It is attractive for tourist due to Naneghat, Ane malshejghat, Lenyadri Ganesh temple etc. Generally it is calm place. However in the season of Ganesh festival tremendous noise pollution was observed during Sept. 2016. There are no. of Ganesh Mandals in Junnar nearly fourteen. Measurements were doen by simple Laboratory dB Meter. The maximum dB was found to be 97 dB & minimum dB was 64 dB. Twelve Ganesh Mandals showed more than 80 dB. Noise pollution appears to be simple & generally neglected. However it may create physical and mental problems. The environment of Junnar city during all such festivals is tremendously polluted. The table given below shows the starting of disturbance in environment. Measurement were also doen in past. The fitures of dB were remarkeably large & troublesome.

### GANESH FESTIVAL SEPT-2016

~~This project is perform~~ on Wednesday, 14 September 2016  
The Observations are as follows

No	Name of Ganesh Mandals	Noise Level in 'dB'	Time (PM)
1	Pardeshpura Peth Ganesh Mandal	80	7.08
2	Sadabazar Ganesh Mandal	84	7.16
3	Pansumba Peth Ganesh Mandal	92	7.32
4	BhaiKotwal Cowk Ganesh Mandal	86	7.46
5	Khalacha Mali Wada Ganesh Mandal	88	7.59
6	Bhoi Aali Ganesh Mandal	86	8.13
7	Teli Budhwar Peth Ganesh Mandal	78	8.22
8	Bhramhan Budhwer Peth Ganesh Mandal	82	8.30
9	Sarai Peth Ganesh Mandal	84	8.46
10	Ravivar Peth Ganesh Mandal	86	8.58
11	Lonar Aali Ganesh Mandal	90	9.07
12	Kalyan Peth Ganesh Mandal	78	9.15
13	Varali Aali Ganesh Mandal	64	9.22
14	Shankarpura Peth Ganesh Mandal	70	9.30

This figures of dB are minimum.
