

## Distinctiveness of College

Deccan region is one of the world famous hotspots and belongs to Pune district. The variety of medicinal plants is found in this region. People belonging to adivasi area find source of income by selling medicine. The adivasi people sell fruits plants and medicinal plants in the bazaar. Our college conducts orientation program regarding medicine plants to orient students. Most of the students of our college are from hilly area where there are forts, temples, caves which are surrounded by hills and valleys. Travel and tourism course is also run by college to create job opportunity to the adivasi students. Our college has a tie-up with Government of Maharashtra for leopard rehabilitation and rescue.

The photographs are hung on the wall of the colleges or towers in the public place with the pictures of celebrities saying that “save nature save universe”. The fact is that ‘the people are the enemy of people’. Due to realization of destruction of the forest, hills and valleys human beings suffer from scarcity of water and imbalance of oxygen. Understanding this fact our college started to bring forward the new concept of terrace garden. Thousands of plants are nurtured by the department of Botany on the terrace.

The intention behind the terrace garden is to enhance the thought in the mind of the college youth to let them know how to develop the garden even on the terrace to have to maintain healthy atmosphere knowing ‘nature is creator, protector and life giver’.

By using the pots of the plants we are able to decorate area of the buildings. The students also feel happy in the learning systems in the midst of nature. The cool weather is even maintained during the burning heat of May/October. The terrace plantation scheme will surely enrich feelings of awareness regarding plants among the youth.
