Cross Cutting Issues

Sr. No.	Name of Subject	Topic	Outcome	Cross Cutting Issue
1.	Data Structure Using C	Structures	<ol style="list-style-type: none"> To learn the systematic way of solving problem. To understand the different methods of organizing large amount of data. To implement efficiently the different data structures. To implement solutions for specific problems. 	It cannot be cleanly decomposed from the rest of the system design.
2.	Object Oriented Programming using C++	Structures and union C Preprocessor File handling	<ol style="list-style-type: none"> To understand basic object oriented concepts and the issues involved in effective class design. To write C++ programs that use object oriented concepts such as information Hiding, constructors, destructors, inheritance. 	Also cannot be cleanly decomposed from the rest of the system implementation.
3.	Java Programming	File Handling, Swing, JDBC, Servlet	<ol style="list-style-type: none"> To handle Object Oriented Programming language. To handle abnormal termination of a program using exception. To create flat files. To design User Interface using Swing and AWT. 	It can result in either scattering (code duplication).
4.	VB.Net	Framework, Exception Handling, Database in VB	<ol style="list-style-type: none"> To design and develop Windows-based business applications using Visual Basic.NET programs that meet commercial programming standards To design and develop Web based business applications using Visual Basic.NET programs that meet commercial programming standards 	Also can result in either tangling (Significant dependencies between systems).
